On January 11, 2016 the Criminal Division implemented Iteration 1 of a new criminal case management system (CMS), CTrack. Iteration 1 affects Parole and PRCS case processing only. PRCS and Parole cases in the new CMS will be fully electronic. Case data like hearings, charges, sentencing, and parties will be available on the PCA (Index) as it is now. The public will view documents for these case types in the electronic court file via the Kiosks located in Rm. 101 of the downtown courthouse.

Although Iteration 1 only affects PRCS and Parole cases, the implementation did result in a change to the Felony and Misdemeanor case file numbers. Now felony and Misdemeanor cases have a designation of FE and MI instead of just an F or M. Also, the numbering is continuous rather than repeated for each case type (i.e. its now 16FE000123, 16MI000124, etc.). Except for the case numbering all other processing of Felony and Misdemeanor cases remains as it has been in the old CMS.

Iteration 2 for all of the other Criminal Case types is still in development and is expected to be implemented later this year.
